ORACLE Database Design and Programming with SQL I

CIS 2033, CourseID # 1139

Every business uses databases; Oracle is the world's premier database software. Acxiom, central Arkansas' global data company, asked Oracle to train students to become potential Acxiom employees. NPCC's Oracle Academy is designed to do that, and more!

This course in Database Design, along with the 2nd Academy course in SQL Programming (offered Spring 2010), will qualify students to take the Oracle Certified Associate Exam 1.

No textbook is required: the entire curriculum, quizzes, and tests are hosted on Oracle's servers, which can be accessed anywhere (high-speed internet connection recommended).

Prerequisites: good computer skills.

Weekly virtual chat sessions give students the opportunity to ask questions and clarify concepts.

Course dates:
Aug. 20 – Dec. 8, 2009
